*"Innovation requires collaboration fueled by an entrepreneurial spirit willing to push boundaries while undertaking a journey in pursuit of a better way." Chornco CEO*

## **Are you a high volume consumer of fuel?**

***Chornco transforms fuels from being detractors to becoming collaborators for reducing operating costs and optimizing environmental stewardship.***

Chornco's proprietary products deliver multiple integrated benefits that break through fuel performance expectations and boundaries.

Review the Chornco beta website. Watch customers explain the results and benefits they have obtained in real world application. Next, read the testing data overviews. Then contact us to have any questions answered and discuss how Chornco will work for you.

Join Chornco's customers and obtain self paying benefits in your own operating environment. Reduce consumption and extend lifecycles of consumables. Resolve unscheduled maintenance due to incompatibility, lubricity, and fuel contamination problems. Release more energy out of each unit of fuel to generate more electricity, go further, or go faster.

**Get more out of less fuel and produce cleaner emissions.**

*Chornco treats all grades and blends of petroleum derived fuels and biodiesels specified for use on land or sea, in stationary or mobile equipment.*

*Treated fuels remain within specification.*
